

Text Editors

Chantilly Robotics (Team 612)

Text Editors

- Are the tools that programmers use to improve their efficiency
- Many have common features that save you time
- Each has a different design mentality
- Popular editors come and go, based on the programmer interest level

Today's popular editors

- Atom
- Vim
- Emacs
- Sublime Text
- Kate

FRC Robotics

- Has traditionally favored Eclipse and NetBeans
- This year we are going to try using the Atom editor

Atom <https://atom.io/>

Packages to install

- In the menu, Edit->Preferences
- atom-beautify
- file-icons
- language-markdown
- minimap

What you'll use for now
